Dear Clive,

I would like to take this opportunity to thank you for your expert assistance in resolving my backup issues.

I needed to safeguard my Sage and other business files, automatically, because the day I forgot, would be the day I would have a crash. You installed a small program, set it up and tested it, and even loaned me a USB drive for me to backup and restore my system, until I got my own.

Your service is second to none and I wouldn't hesitate in recommending you to my clients and friends.

Yours sincerely

Darren Greenfield Dakiniewicz
